# GROWall SYSTEM

## MODULAR GREEN WALL SYSTEM

### **SIMPLE DESIGN**

Simple design makes for easy installation and panels are interchangeable. Seamless-solid back panel keeps water in the system and away from the underlying wall. As a result, no vapor barrier or additional structural support is required.

### **ROOM TO GROW**

GROWall modules have an open cavity which allows plant roots to spread throughout the module. This promotes growth and helps sustain healthy-thriving plants.

### **EFFICIENT WATER SUPPLY**

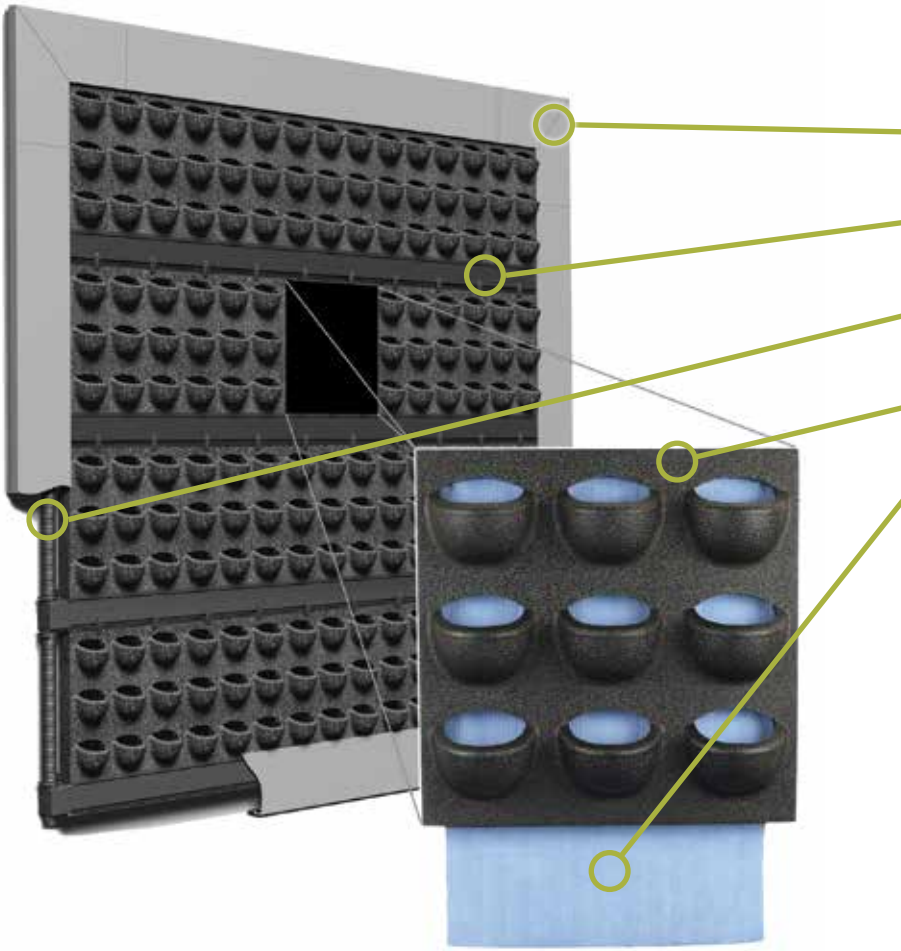

Plants in GROWall modules are supplied water through a highly efficient and effective polyester-blend-fabric wicking system. No wasted energy from pumps to recycle water through the system. No wastewater or run-off like that with drip systems.

### **INDOOR OR OUTDOOR INSTALLATION**

The GROWall system is an equally effective green wall system for indoor or outdoor applications.

GROWall PANEL COMPONENTS

**Decorative Frame (optional)**

**Reservoirs**

**Built-In Irrigation Hose**

**GROWall Module**

**Wicking Fabric**

GROWall PANEL SPECIFICATIONS

- Weight .....8.2 lbs./sq.ft.
- Module Material.....recycled polypropylene foam
- Gutter Material .....anodized recycled aluminum
- Hose Material .....recycled plastic
- Wicking Fabric .....polyester blend

# GROFence SYSTEM

The pre-grown GROFence panels are perfect for privacy screens, noise cancellation or blocking unsightly views. The panels are easy to install and can be grown with a variety of vining plant species. GROFence panels can be planted directly into a soil base or optionally planted in our planter boxes which are available in a variety of different colors. Each GROFence panel is 4-feet wide and comes in heights of 4, 6, or 8 feet. Panels are free standing and do not require attachment to wall or other vertical structure.

## VARIETY OF HEIGHTS

4' X 4'

4' X 6'

4' X 8'
